DELINEATION OF PRIVILEGES - FAMILY MEDICINE**LEVEL I (CORE) PRIVILEGES**

1. Successful completion of an ACGME accredited Family Medicine Residency training program, AOA, Royal College of Physicians and Surgeons of Canada, or an ACGME equivalent Family Medicine Residency Program.
2. Members of the clinical service of Family Medicine must, within six (6) months from appointment to staff, achieve board certification in Family Medicine. *Maintenance of board certification is mandatory for all providers who have achieved this status*
3. Demonstrate or document requisite training for credentials and requested privileges as indicated below.

Level I (core) privileges are those able to be performed after successful completion of an accredited residency program in that core specialty. The removal or restriction of these privileges would require further investigation as to the individual's overall ability to practice, but there is no need to delineate these privileges individually.

LEVEL I (CORE) PRIVILEGES

Applicants for Level I (core) privileges have successfully completed residency training in family practice and have broad experience in the management of acute and chronic illness in adults and children (individuals below the age of 19 years). They are able to diagnose and treat conditions which have typical presentations, recognized treatments, and expected outcomes. Consultation is expected when specialized skills are required or where complications arise which are beyond the usual scope of the physician's practice.

History and Physical for diagnosis and treatment plan including breast, rectal and pelvic exam; diagnosis, treatment plan, consultations, hospital visits, patient counseling, pain management, and like skills included in any Family Practice training program curriculum.	Foley catheterization
General Admitting Privileges - Physicians granted admitting privileges will be expected to have a broad range of knowledge, experience, training and competence to diagnose and treat most conditions that have common presentations, recognized treatments and expected outcomes. Department members with admitting privileges will be expected to request consultations in cases where specialized skills are required and in circumstances in which there is significant uncertainty in the optimum management of the patient. Examples where consultation would be expected include, but are not limited to, life-threatening complications, unanticipated deterioration in the patient's condition, or absence of expected response to standard therapy. Such consultations will be obtained promptly.	Incision and drainage
Arthrocentesis - adult	IUD insertion and removal
Assist at surgery under direct supervision of the surgeon. (Cannot act as attending on record)	Laceration repair
Biopsy, excision and incision of skin growths, nails, and superficial soft tissues	Nasogastric tube insertion
Cardiac monitoring	Simple non-displaced fractures - adult
Endometrial Biopsy	

PLEASE NOTE: Please check the box for each privilege requested. Do not use an arrow or line to make selections. We will return applications that ignore this directive.

<u>LEVEL II PRIVILEGES</u> <i>Applicants for Level II privileges must meet criteria for Level I privileges and meet additional training or experience requirements listed, within last two (2) yrs. (Case list required at initial and reappointment)</i>	PHYSICIAN REQUEST	Granted	Not Granted*	With Following Requirements** (Provide Details)
Arthrocentesis – child (10)				
Colposcopy and Biopsy (8)				
CVP Insertion (5)				
Dilatation and Curettage (8 procedures)				
Elective Termination of Pregnancy to 12 weeks (8)				
Flexible Sigmoidoscopy with Biopsy –adult (25) <i>(Notice: If a physician is credentialed to do colonoscopies, they are automatically credentialed to do flexible sigmoidoscopies.)</i>				
Low Risk Vaginal Delivery, Episiotomy / Repair of 1,2,3 Lacerations <i>(40 deliveries in last three (3) yrs for initial privilege; 10 deliveries in last (2) yrs. for reappointment)</i>				
Lumbar Puncture (adult 5/child 5/newborn 5)				
Newborn Circumcision (8 at initial and reappointment)				
Non-operative reduction of common closed fractures or dislocations-adult/child (10)				
Outlet Assisted (Forceps/Vacuum) Delivery (8)				
Screening Colonoscopy with biopsy (50) <i>(Notice: If a physician is credentialed to do colonoscopies, they are automatically credentialed to do flexible sigmoidoscopies.)</i>				
Simple non-displaced fractures (child) (10)				
Thoracentesis- adult (5)				
Vasectomy (5)				
Screening Ultrasonography				
Screening Ultrasonography - Abdominal (25 initial, 5 reappointment)				
Screening Ultrasonography - Aortic (25 initial, 5 reappointment)				
Screening Ultrasonography - Carotid (25 initial, 5 reappointment)				
Screening Ultrasonography - Prenatal (25 initial, 5 reappointment)				
Screening Ultrasonography - Thyroid (25 initial, 5 reappointment)				

<i>Privileges for diagnostic or therapeutic procedures that are outside of the usual scope of residency training require documentation of prior training/experience within the past two (2) years and of continued current competency prior to the granting/renewal of such privileges.</i>	PHYSICIAN REQUEST	Granted	Not Granted*	Specialty/Chief of Service Initials
Colonoscopy (50) with Polypectomy (minimum 20) at initial request and reappointment. <i>(Notice: If a physician is credentialed to do colonoscopies, they are automatically credentialed to do flexible sigmoidoscopies.)</i>				

<u>MODERATE/CONSCIOUS SEDATION</u>	
1. Patient is able to respond to verbal commands.	
2. Patient is able to breathe spontaneously.	
3. Patient is able to maintain airway.	
4. Patient is able to maintain adequate oxygenation.	
5. Patient is able to maintain adequate ventilation.	
6. Patient is able to maintain adequate circulation.	
7. Patient is able to maintain adequate temperature.	
8. Patient is able to maintain adequate hydration.	
9. Patient is able to maintain adequate electrolyte balance.	
10. Patient is able to maintain adequate renal function.	
11. Patient is able to maintain adequate hepatic function.	
12. Patient is able to maintain adequate endocrine function.	
13. Patient is able to maintain adequate immune function.	
14. Patient is able to maintain adequate neurological function.	
15. Patient is able to maintain adequate psychological function.	
16. Patient is able to maintain adequate social function.	
17. Patient is able to maintain adequate spiritual function.	
18. Patient is able to maintain adequate quality of life.	
19. Patient is able to maintain adequate patient satisfaction.	
20. Patient is able to maintain adequate patient safety.	

1. *Providers seeking privileges in moderate/conscious sedation must complete either the ASA Sedation course, Medsimulation course or Safe Sedation course, receiving a score of 85% or above and repeat the course every four (4) years, or two (2) years for those courses with a two (2) year expiration date).*
 2. *Providers must also maintain airway management skills through current completed training and certification in ACLS, ATLS, PALS or NRP.*
- (For details on course availability and maintenance, please review the Moderate/Conscious Sedation document located on our credentialing web page.)***

Requested	Granted	Not Granted*	With following requirements** (provide Details)

KEY	
<u>*NOT GRANTED DUE TO:</u> Provide Details Below	<u>**WITH FOLLOWING REQUIREMENTS</u> Provide Details Below
1) Lack of Documentation	1) With Consultation
2) Lack of Required Training/Experience	2) With Assistance
3) Lack of Current Competence (Databank Reportable)	3) With Proctoring
4) Other (Please Define) (i.e., Exclusive Contract)	4) Other (Please Define)
